ZGDV Darmstadt
64283 Darmstadt
stefan.goebel@zgdv.de

Knowledge Media Design represents a new –very interdisciplinary- research discipline combining cognitive, education and computer sciences, design and media in order to improve knowledge transfer and knowledge design.

During the workshop various KMD aspects are discussed in the context of museum applications and museums as third learning places in general. Invited speakers (research and business oriented) will present their individual views: As storytellers, as artist, as curator, as technology provider, as teacher or (simply?) as museum visitor.

Topics & Keywords

Knowledge Media Design, Museum 3rd Learning Place, Interactive Storytelling, Mixed Reality Spaces, Game Based Interfaces, Mobile Applications, Infrastructure and Websites, KMD for Kids.

Background

A first workshop to this topic took place at EVA 2005 in Florence, Italy. The results of that earlier workshop will be presented at the beginning of the workshop in Berlin.
