

Ikonospace

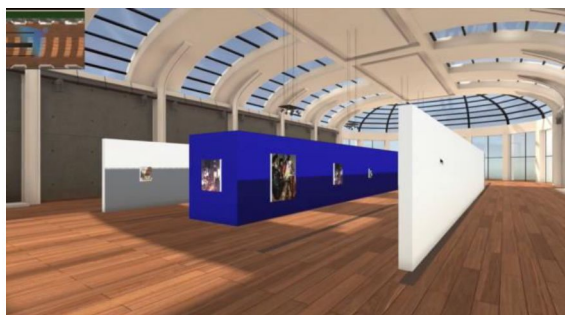

Elizabeth Markevitch

Markevitch Media GmbH, Germany, markevitch@ikono.org

ABSTRACT: ikonospace is a software designed from the ground up for Art professionals and enthusiasts. It offers tools for galleries, museums, collectors and artists to help them create 3D virtual exhibitions that can then be shared to peers or to the public.

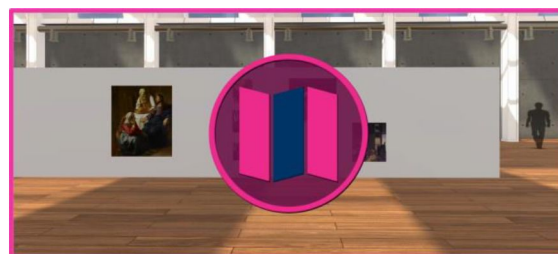

1. INTRODUCTION

ikonospace is first and foremost a tool to plan and prepare exhibitions. Using very intuitive controls, users can recreate past or future exhibitions in minutes and walk through it in real time.

Creating walls, importing new artwork or publishing your exhibit all in 3D is now made easy.

This not only helps collaboration between team members from the art curator to the exhibition designer but also offers new marketing solutions for art institutions.

ikonospace is currently in a Beta stage and will be available to the public in January 2016

By creating a common platform for the art world, ikonospace is offering tools that were not previously affordable by most art institutions.

ikonospace is coming with a whole suite of services such as 3D modelling of user's space in high quality 3D graphics, 3D scanning of art such as sculptures or art installations and a distributing platform to connect you to your clients.
