

# CONTENTS

Acknowledgements/Danksagung (M. S. u. T. v. K.)	VII
Introduction	1
Research history at the site	3
Geomorphology and stratigraphy	4
Excavation and context of the lithic and faunal assemblages	5
Die Kleinsäugerfauna (THIJS VAN KOLFSCHOTEN)	8
Paläoökologische und stratigraphische Aussagen	11
Stratigraphie	12
The large mammal fauna	13
Conservation and recording of faunal remains	13
Faunal spectrum and biostratigraphy	15
Bone preservation and body part representation	29
Spatial distribution of faunal remains in plan and in section	55
Modification by carnivores and humans	66
Comparison with the faunal assemblage from Tönchesberg 2b	69
The lithic assemblage	71
Recording the lithic industry – the database	71
Lithic raw material	71
Lithic raw material sources and availability	74
Raw material spectrum and spatial analysis	77
Comparison of raw materials with other sites and discussion	86
Technology	91
Representation and spatial analysis of technological groups (»Grundformen«)	91
Morphological and metrical analysis of technological groups	96
Comparison of technology with other sites	106
Evidence of the technology for the chronological position of the assemblage	107
Retouched tools	108
Spectrum of tool types and spatial distribution	108
Typological considerations and discussion	124
Quantification of the retouched forms	125
Evidence of the typology for the chronology of the site	128
Burnt artefacts and the use of fire	139
Other lithic artefacts – hammerstones, pebble tools	140
Discussion and interpretation	143
Chronological position of the Hummerich assemblage	143
Site function	149
References	153
