Introduction	1
The Mâconnais region and the site of Solutré	1
The history of faunal research at Solutré	3
Description of the sites	5
The sector P16 site	5
The sector I11 site	5
Pollen analysis	8
Sedimentology	9
Absolute dating	9
Lithic artefacts	10
Recovery during excavation and quantification of the faunas	11
Recovery during excavation	11
Quantification of the faunas	12
The spatial distribution of faunal remains at sector P16	13
Conjoined faunal remains and their contribution to the interpretation of the distribution of finds in sector I11 (Q69, 79 & 89)	22
The larger mammal fauna from sector P16	24
Horse	24
Reindeer	69
Bison	90
Wolf	109
Fox and wolverine	114
The larger mammal fauna from sector I11 (Q 69, 79, 89)	116
Horse	116
Reindeer	132
Large bovid	136
Wolf	136
Small cervid	136
The faunal remains from the Magdalenian deposits in sectors P16 and I11	137
Generalities about the sector P16 and I11 sites	137
A comparison of the three main species – horse, reindeer and bison – at the sector P16 and I11 sites	138
Horse hunting tactics at Solutré	144
A comparison of horse remains from magdalenien sites in Europe	150
Horse dominated faunas: a Magdalenian phenomenon?	159

Folding illustrations

- 1 The distribution of faunal remains at sector P16.
- 2 Topography of the sector P16 site. The numbers 1-4 refer to sections projected across the site to record the form of the channel feature. The »edges« of the channel were reconstructed from the distribution of finds plotted in folding illustration 1.
- 3 Plot of long bones recovered in the channel and rose diagrams recording their orientation. – a) Bone orientation in relation to the compass azimuth (=north). – b) Bone orientation in relation to the long axis of the channel (= NW-SE) (see tab. 2 for observed frequencies of bone specimens).
- 4 Plot of mechanically and anatomically conjoined faunal remains in sector P16.
- 5 Plot of elements of individual animals in sector P16.
- 6 Distribution of the occipital bones from horse crania in sector P16.
- 7 Distribution of horse humeri in sector P16.
- 8 Distribution of horse radii in sector P16.
- 9 Distribution of bison remains in sector P16.
