

LIST OF ILLUSTRATIONS

Map of Crete: ▲ modern towns; ■ major palaces (for the main archaeological sites mentioned in the text see *fig. 17 b*)/p. XVI.

Fig. 1 The MM three-sided soft stone prism: a. frontal view of a profile; b. oblique view (the latter adapted from Yule 1980 a, 28)/p. 17.

Fig. 2 Prism with slightly convex seal faces/p. 17.

Fig. 3 a. Gable-shaped prism; b. Wedge-shaped prism/p. 18.

Fig. 4 Examples of various configurations of the profiles of prisms: a. with broad, flat interfacial edges; b. with grooves around the seal faces; c. with very deep grooves which set off the seal faces from the body of the seal; d. with grooves only on the profile (adapted from CMS VI); e. with scratch marks on the profile/p. 18.

Fig. 5 Examples of non-canonical stringholes: a. eight-shaped; b. acentric /p. 19.

Fig. 6 Example of a gable/p. 21.

Fig. 7 The gable CMS VI no. 14/p. 21.

Fig. 8 Different state of preservation of the prisms: a. workshop fresh; b. unfinished; c. d. abraded/p. 22.

Fig. 9 Bronze Age three-sided prisms from areas outside the Aegean: a. bought in Egypt (adapted from Evans 1909, 123 fig. 58); b. from Bahrain (adapted from Weisgerber 1980, 86 fig. 15); c. from Oman (adapted from Weisgerber 1980, 85–86 fig. 15); d. Syrian (?) (adapted from Erlenmeyer – Erlenmeyer 1958, pl. XXIX fig. 1 a–1 c, pl. XXX fig. 9); e. from Turkestan (adapted from Schmidt 1908, 169 no. 400, pl. 45 no. 8)/p. 24.

Fig. 10 Examples of cylinder seals with more than one seal face: a. three panelled cylinder seal, Djemdet Nasr period (adapted from Erlenmeyer – Erlenmeyer 1958, pl. XLIV fig. 76); b. four panelled cylinder seal, Early Dynastic Period (adapted from Flinders Petrie 1917, pl. VII 163); c. four-panelled cylinder seal, Middle Kingdom (adapted from Frankfort 1939, pl. XLVI o, p, q)/p. 26.

Fig. 11 Examples of seals made from boar's tusk: a. stamp cylinder with two seal faces; b. stamp cylinder with one seal face; c. gable-shaped button; d. gable with one seal face (adapted from Panagiotopoulos 2002, pl. 44 no. E10); e. gable with three seal faces/p. 28.

Fig. 12 Soft stone and medium-hard stone sources in Crete (data from Seager 1910; Evans 1935; Warren 1969; Becker 1976; Hughes Brock 2000): ●/○ steatite; ■/□ chlorite; ▲/△ breccia; ◆ sepiolite (the outline shapes show possible sources). The most important outcrops are marked with numbers: 1 Fodele;

LIST OF ILLUSTRATIONS

2 Spili; 3 Vorizia; 4 Kamares – Zaros; 5 Miamou – Krotos; 6 Katharo Plateau; 7 Sarakina Valley/p. 32.

Fig. 13 Intaglios cut in the freehand technique: a., b. steatite; c. chlorite; d. breccia/p. 39.

Fig. 14 ‘Cup sinkings’ opened by the combined use of a tubular and a solid drill: a. the hindquarters and the chest of the *Agrimi*; b. the upper *Head of ‘dog/lion with hook’*; c. the upper ‘*String vessel*’; d. the ends of the *Cross pommée*/p. 42.

Fig. 15 Examples of intaglios cut in fast motion techniques. In a.–d. are shown prisms and a cushion which could have been cut with the mechanical spindle technique (adapted from Dimopoulou 2000, 30 fig. 2 no. 18, 31 fig. 3 no. 28). In the intaglio depicted on h. only the ‘cup sinkings’ have been executed with the vertical pressure technique/p. 45.

Fig. 16 ‘Trial’ pieces/p. 48.

Fig. 17 Distribution of the prisms: a. find places of prisms with secure provenance: 1. Palaikastro; 2. Kato Zakros; 3. Pseira; 4. Mochlos; 5. Kavousi; 6. Trapeza; 7. Agios Charalampos; 8. Malia; 9. Smari; 10. Knossos; 11. Poros Katsampas; 12. Koumasa; 13. Apesokari; 14. Platanos; 15. Moni Odigitria; 16. Agia Triada (17. Agia Eirini, Kea; 18. Midea, Argolis). b. find places of prisms with secure and uncertain provenance: 1. Palaikastro; 2. Epano Zakros; 3. Kato Zakros; 4. Lamnoni; 5. Nea Praisos; 6. Sitanos; 7. Sykia; 8. Adromyloi; 9. Lithines; 10. Siteia; 11. Pseira; 12. Mochlos; 13. Turloti; 14. Lastros; 15. Kavousi; 16. Pacheia Ammos; 17. Gournia; 18. Koprana; 19. Lato i Etera; 20. Kritsa; 21. Elounta; 22. Kasteli; 23. Neapoli; 24. Anaulochos; 25. Milatos; 26. Malia; 27. Vrachasi; 28. Krasi; 29. Trapeza; 30. Pinakiano; 31. Psychro; 32. Agios Charalampos; 33. Kato Metochi; 34. Gonies; 35. Askoi; 36. Avdou; 37. Mochos; 38. Potamies; 39. Kalo Chorio Padiados; 40. Gouves; 41. Smari; 42. Kasteli; 43. Choumeri; 44. Ligortynos; 45. Koumasa; 46. Apesokari; 47. Platanos; 48. Gortys; 49. Moni Odigitria; 50. Kamilari; 51. Agia Triada; 52. Agios Onoufrios; 53. Choumeri; 54. Axos; 55. Gonies; 56. Poros Katsampas; 57. Knossos; 58. Artsa; (59. Agia Eirini, Kea; 60. Midea, Argolis; 61. Egypt)/p. 55.

Fig. 18 Malia/Eastern Crete Steatite Prisms/p. 64.

Fig. 19 Hieroglyphic inscriptions met on Malia/Eastern Crete Steatite Prisms/p. 67.

Fig. 20 Hieroglyphic inscriptions on Malia/Eastern Crete Steatite Prisms which show elements which bring them close to hard stone hieroglyphic seals/p. 68.

Fig. 21 Hieroglyphic four-sided prisms of the Malia/Eastern Crete Steatite Group: a. a piece which belongs stylistically well within the group; b. a piece which is reminiscent of hard stone hieroglyphic seals on account of its elaborate hieroglyphic inscriptions on all sides/p. 69.

Fig. 22 Examples of Malia Workshop prisms: a.–d. Deep Cut Style; e.–h. Hasty Cut Style; i.–l. Irregular Cut Style/p. 76.

Fig. 23 Examples of prisms from places in Malia outside the Workshop which could have been produced there/p. 79.

Fig. 24 Prisms from places in Malia outside the Workshop whose relationship with it is not clear/p. 80.

LIST OF ILLUSTRATIONS

- Fig. 25 Prisms from places in Malia outside the Workshop which were probably not manufactured there/p. 82.
- Fig. 26 Cluster of the Full-Figured Bovine/p. 85.
- Fig. 27 Cluster of the Flat 'Blanks'/p. 86.
- Fig. 28 Cluster of the Uncomplicated Images/p. 87.
- Fig. 29 Cluster of the Clear Cut Hieroglyphs/p. 87.
- Fig. 30 Cluster of the Man with the Swollen Knees/p. 88.
- Fig. 31 Cluster of the Motionless Figures (b.–d. adapted from Yule 1980 b, pls. II, III)/p. 89.
- Fig. 32 Cluster of the Hasty Slanting Cut/p. 89.
- Fig. 33 Cluster of the Plain Quadruped/p. 90.
- Fig. 34 Cluster of the Bulky Quadruped/p. 90.
- Fig. 35 Cluster of the Dynamic Cut/p. 91.
- Fig. 36 Cluster of the Crouching 'Sheep'/p. 91.
- Fig. 37 Cluster of the Squat Figures/p. 93.
- Fig. 38 Cluster of the Muscular Men/p. 93.
- Fig. 39 Cluster of the Head of an Agrimi with Forward Directed Muzzle/p. 94.
- Fig. 40 Prism with the T-Shaped Head of an 'Ox'/p. 95.
- Fig. 41 Cluster of the Progressive Tendencies/p. 95.
- Fig. 42 Cluster of the Triangular Scorpion/p. 97.
- Fig. 43 Cluster of the Man and the Ruminant/p. 97.
- Fig. 44 Malia/Eastern Crete Steatite Prisms with centred-circles whose compositions show influences from the glyptic of central Crete/p. 99.
- Fig. 45 Examples of indiosyncratic engraving on Malia/Eastern Crete Steatite Prisms/p. 100.
- Fig. 46 Malia/Eastern Crete Steatite Prisms with similar iconography on two or three sides/p. 101
- Fig. 47 Two stylistically different Malia/Eastern Crete Steatite Prisms with similar iconography on two sides/p. 101.

LIST OF ILLUSTRATIONS

Fig. 48 Two stylistically different Malia/Eastern Crete Steatite Prisms with similar iconography on two sides/p. 102.

Fig. 49 Examples of stylistically different Malia/Eastern Crete Steatite Prisms which show an obliquely placed *Agrimi* on one seal face/p. 102.

Fig. 50 Prisms combining on two or three sides the hieroglyphic inscription CHIC signs 044 – 049, a *Pig/boar*, and/or a *Swastika* flanked by *Hatched Ds*/p. 103.

Fig. 51 Prisms with images composed of many devices/p. 103.

Fig. 52 Other Malia/Eastern Crete Steatite Seals/p. 105.

Fig. 53 Seals engraved in the horizontal spindle with iconography reminiscent of the Malia/Eastern Crete Steatite Seals/p. 109.

Fig. 54 Sealings impressed by Malia/Eastern Crete Steatite Seals/p. 110.

Fig. 55 Distribution of the Malia/Eastern Crete Steatite Prisms: a. find places of prisms with secure provenance: 1. Palaikastro; 2. Kato Zakros; 3. Pseira; 4. Mochlos; 5. Kavousi; 6. Trapeza; 7. Agios Charalampos; 8. Malia; 9. Smari; 10. Koumasa; 11. Platanos. b. find places of prisms with secure and uncertain provenance: 1. Palaikastro; 2. Epano Zakros; 3. Kato Zakros; 4. Lamnoni; 5. Sitanos; 6. Nea Praisos; 7. Lithines; 8. Adromyloi; 9. Sykia; 10. Siteia; 11. Pseira; 12. Mochlos; 13. Tourloti; 14. Lastros; 15. Kavousi; 16. Pacheia Ammos; 17. Gournia; 18. Koprana; 19. Lato i Etera; 20. Kritsa; 21. Elounta; 22. Kasteli; 23. Neapoli; 24. Anaulochos; 25. Milatos; 26. Vrachasi; 27. Malia; 28. Kراسi; 29. Trapeza; 30. Psychro; 31. Agios Charalampos; 32. Kato Metochi; 33. Pinakiano; 34. Gonies; 35. Mochos; 36. Avdou; 37. Askoi; 38. Kasteli; 39. Potamies; 40. Smari; 41. Choumeri; 42. Artsa; 43. Knossos; 44. Heraklion; 45. Gonies; 46. Axos; 47. Choumeri; 48. Kamilari; 49. Moni Odigitria; 50. Koumasa; 51. Apesokari; 52. Platanos; 53. Gortys./p. 113.

Fig. 56 Prisms with EM III/MM I Influences/p. 116.

Fig. 57 Other seals stylistically close to the Prisms with EM III/MM I Influences/p. 118.

Fig. 58 Mesara Chlorite Prisms/p. 121.

Fig. 59 Foliage/Multiple Strand Motif Cluster/p. 122.

Fig. 60 a.–c. Prism with the Walking *Agrimi*; d.–h. Seals with similar iconography/p. 123.

Fig. 61 *Agrimi*/Scorpion Cluster/p. 124.

Fig. 62 Two Prisms with Ornamental Devices A/p. 125.

Fig. 63 Squid/Paisley Cluster/p. 126.

Fig. 64 Two Prisms with Ornamental Devices B/p. 126.

LIST OF ILLUSTRATIONS

- Fig. 65 Prism of the Man with the “Loop” /p. 127.
- Fig. 66 Seals which show iconographic and/or stylistic similarities to prisms of the Foliage/Multiple Strand Motif Cluster and to the Prism with the Walking Agrimi/p. 129.
- Fig. 67 Seals which show iconographic and/or stylistic similarities to prisms of the Agrimi/Scorpion Cluster and to the Two Prisms with Ornamental Devices A/p. 129.
- Fig. 68 Seals which show iconographic and stylistic similarities to the Squid/Paisley Cluster and to the Two Prisms with Ornamental Devices B/p. 130.
- Fig. 69 Sealings impressed by Mesara Chlorite Seals or by seals which show similarities to them/p.133.
- Fig. 70 Distribution of the Mesara Chlorite Prisms: a. find places of prisms with secure provenance: 1. Platanos; 2. Apesokari; 3. Agia Triada. b. find places of prisms with secure and uncertain provenance: 1. Ligortynos; 2. Platanos; 3. Apesokari; 4. Kamilari; 5. Agia Triada; 6. Agios Onoufrios/p. 135.
- Fig. 71 The Dawkins Prism/p. 138.
- Fig. 72 Seals of the Dawkins Prism Group/p. 139.
- Fig. 73 The Phaistos Agrimi Prism/p. 140.
- Fig. 74 Seals with iconography reminiscent of the Phaistos Agrimi Prism: a., b. discoids; c. lentoid/p. 140.
- Fig. 75 Sealings with similar iconography to the Phaistos Agrimi Prism/p. 140.
- Fig. 76 The British Museum Prisms/p. 142.
- Fig. 77 Seals with stylistically similar engraving to the British Museum Prisms: a. disc; b. bottle/p. 142.
- Fig. 78 The Platanos Prism with the Cable Devices/p. 144.
- Fig. 79 Seals related to the Platanos Prism with the Cable Devices/p. 144.
- Fig. 80 The Kalo Chorio and the Psychro Prisms with the Cable Devices/p. 145.
- Fig. 81 Seals which are related or belong to the same group as the Kalo Chorio and the Psychro Prisms with the Cable Devices/p. 145.
- Fig. 82 An Archaic (?) steatite seal which shows stylistic and iconographic similarities to the Kalo Chorio and the Psychro Prisms with the Cable Devices (adapted from Max Bernheimer 2007, 33 no. EG-1)/p. 146.
- Fig. 83 Four-sided prism from a Sixth Dynasty grave in Mahâsna, Egypt (adapted from Evans 1909, 129 fig. 66)/p. 146.

LIST OF ILLUSTRATIONS

- Fig. 84 The Platanos Ornamental Prism/p. 149.
- Fig. 85 Seals with similar compositions as the Platanos Ornamental Prism/p. 149.
- Fig. 86 Sealings with similar compositions as the Platanos Ornamental Prism/p. 149.
- Fig. 87 Central Crete Ornamental Prisms: a.–h. the Steatite Cluster; i.–p. the White Prisms Cluster/p. 151.
- Fig. 88 Other seals of the Central Crete Ornamental Group: a.–f. the Steatite Cluster; g.–i. the White Prisms Cluster/p. 154.
- Fig. 89 A hard stone three-sided prism related to the Central Crete Ornamental Group/p. 155.
- Fig. 90 Sealings of the Central Crete Ornamental Group/p. 156.
- Fig. 91 Distribution of the Central Crete Ornamental Prisms: a. find places of prisms with secure provenance: 1. Knossos; 2. Heraklion; 3. Moni Odigitria (4. Agia Eirini, Kea; 5. Midea, Argolida). b. find places of prisms with secure and uncertain provenance: 1. Mirampelo; 2. Malia; 3. Knossos; 4. Heraklion; 5. Moni Odigitria; 6. Mesara (7. Agia Eirini, Kea; 8. Midea, Argolida)/p. 158.
- Fig. 92 a. Motifs: *Pig/boar*, *Headless waterfowl*, *Bow*; b. Representational composite: *Bow with Linear arrow*; c. Compound: *Two-armed whirl of Headless waterfowls*/p. 161.
- Fig. 93 a. Representational motifs; b. Ornamental motifs; c. Motifs with both a representational and an ornamental character/p. 162.
- Fig. 94 a.–d. To the left are the basic elements and to the right is the resulting composite device/p. 164.
- Fig. 95 a.–d. In the upper left is the supplemented device, under it are the supplements, and to the right is the resulting composite device/p. 165.
- Fig. 96 a. Dog in the quadruped pose I 1; b. dog in the quadruped pose I 2 (author's data)/p. 300.
- Fig. 97 a. Images in which all devices function as main devices; b. images in which some devices function as main devices and others as fillers/p. 328.
- Fig. 98 Images in which similar representational devices are combined with vegetal devices of uncertain function (compare a.–b., c.–d)/p. 329.
- Fig. 99 Images in which the function of the small representational motifs is unknown: a. the *Dolphin*; b. the *Fish* and the *Dolphin*; c. the *Jug*/p. 329.
- Fig. 100 Images in which small motifs function as fillers: a–b. representational motifs; c. floral motifs; d. ornamental motifs/p. 329.
- Fig. 101 The main strategies according to which the units are combined: a. parataxis; b. rotation; c. antithesis; d. flanking; e. angle-filling; f. enclosure/p. 331.

LIST OF ILLUSTRATIONS

- Fig. 102 Two different effects created from the mobilisation of rotation for the formation of a composition: a., c. radiation; b., d. rotation/p. 333.
- Fig. 103 Different effects created from the mobilisation of flanking and antithesis for the formation of a composition: a. centre-highlighting; b. centre-detachment; c. centre-orientation/p. 333.
- Fig. 104 Different effects created from the mobilisation of enclosure for the formation of a composition: a.–b. image placed in a border; c. composition developing in two layers/p. 333.
- Fig. 105 Frieze effect/p. 335.
- Fig. 106 Rotational effect/p. 336.
- Fig. 107 Radiating effect/p. 336.
- Fig. 108 Quartering effect/p. 336.
- Fig. 109 Circular effect/p. 337.
- Fig. 110 Outline effect/p. 337.
- Fig. 111 Rapport effect/p. 337.
- Fig. 112 Centre-highlighting effect/p. 339.
- Fig. 113 Centre-orientation effect/p. 339.
- Fig. 114 Centre-detachment effect/p. 339.
- Fig. 115 Segmental effect/p. 340.
- Fig. 116 Descriptive images; on o., an image 'descriptive with symbol'/p. 342.
- Fig. 117 'Pictographic' images, combination of different motifs with: a.–d. various types of spiders; d.–g. profile heads of ruminants; h.–m. ruminants and especially *Agrimia*; n.–p. various types of waterfowls/p. 343.
- Fig. 118 Ornamental images/p. 344.
- Fig. 119 Hieroglyphic inscriptions/p. 346.
- Fig. 120 Images of unidentifiable nature/p. 346.
- Fig. 121 Images of uncertain nature/p. 347.
- Fig. 122 The appearance of a '*Pole*' slung with '*String vessels*' in images of different nature: a. descriptive; b. descriptive or 'pictographic'; c.–f. 'pictographic'/p. 347.

LIST OF ILLUSTRATIONS

- Fig. 123 The image 'man taking liquid out of a vessel' in different combinations: a. alone; b. with a 'Figure-of-eight shield'; c. with the *Unidentifiable motif XXVI*; d. with a "Saw branch" /p. 353.
- Fig. 124 Warning sign at the Australia Zoo (adapted from Wikipedia 2009)/p. 355.
- Fig. 125 The three levels to which belong the iconographic units/p. 359.
- Fig. 126 The creation of repetition compounds by the fusion of compositions: a.–g. to the left is the composition and to the right the compound/p. 360.
- Fig. 127 The creation of supplementation compounds by the fusion of compositions. a.–c. to the left is the composition and to the right the compound/p. 361.
- Fig. 128 The creation of border compounds by the fusion of compositions. a., b. to the left is the composition and to the right the compound/p. 361.
- Fig. 129 The process of abstraction and transformation in the creation of new devices. On c., one can follow the fusion of a composition into a compound and the subsequent transformation of the latter into a motif/p. 363.
- Fig. 130 Transformation in the creation of new devices/p. 364.
- Fig. 131 Images on prisms from the Malia Workshop/p. 366.
- Fig. 132 *Head of a 'ram'*, *Head of an 'ox'*, and *Head of a 'goat'* on prisms of the Deep Cut Style/p. 367.
- Fig. 133 *Dogs/lions* on prisms of the Deep Cut Style: a. robust version; b. slimmer version/p. 367.
- Fig. 134 a. Standing *Bovines* on prisms of the Deep Cut Style; b. seated *Bovines* on prisms of the Deep Cut Style (left) and the Hasty Cut Style (right)/p. 368.
- Table 1 Ornamental schemes/p. 403.
