

Acknowledgments

I would like to express my deep appreciation to my doctoral advisor Prof. Dr. Diamantis Panagiotopoulos for his patient guidance and support throughout this work. In addition, I would like to express my deep gratitude to Dr. Jeffrey S. Soles for his continued support in all things for the last fifteen years as the Director of the Mochlos Excavation Project, and particularly for entrusting this material to me. Without his guidance and good humor, this work would not be possible. I would further like to thank the Director of the INSTAP Study Center for East Crete, Dr. Thomas Brogan, and Eleanor Huffman, who allowed me to use all the facilities of the Institute for several extended periods as I completed this work. I would like also to thank the personnel of the INSTAP Study Center for East Crete, and especially Matina Tzari for conservation innumerable works, Douglas Faulmann for both drawing and teaching me to draw vessels and Chronis Papanikolopoulos for his photographs. Special thanks to Dr. Stanley Chang, who created the statistic formula and manipulated my data, as well as to Scott Rosenjack for his guidance and assistance on the statistic pivot tables. More than anybody, I would like to thank my wife, Angela Ratigan, for her unending patience, selflessness, continued support, and editorial skills. Without her daily assistance, I would never have been able to complete this dissertation. Finally, I would like to express my love to my mother, Maria Doudali, and my sister, Iro Kalavri, who have supported me unconditionally since the beginning of my studies and throughout every step in my academic journey.
